

I need a COVID test

The doctor or nurse is going to make sure that I am not sick.

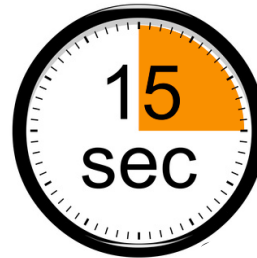

The doctor or nurse will put the swab up one of my nostrils.

While I wait for the doctor or nurse, I can use my tablet.

The test might feel prickly and strange. I might not like the way it feels, but I can handle it.

When I keep my body and head still, the test will take about 15 seconds.

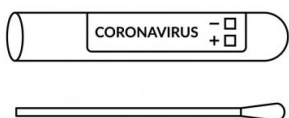

The doctor or nurse might do a swab test in my nose.

I will lean my head back.
I will try to keep my body still.

☑ DONE!

After the test is done, the doctor or nurse will say it's time to go!

The doctor or nurse will use a long cotton swab

Then, we will leave and get a special treat
