

Strategic Plan 2020-23

Improving Lives

To ensure that ASNC's programs are tailored to the unique needs of individuals with autism and empower them to live healthy, safe, and fulfilling lives in their communities.

Address barriers to diagnostics, severe behavior support, and treatment for very young and school-age children as well as adults.

Expand opportunities for adults to build independence, increase self-advocacy, and connect to employment options.

Equip programs across the organization to provide safe and holistic, person-centered services as an integral part of the delivery of whole-person health care.

Supporting Families

To ensure families are empowered to understand their loved one's diagnosis, support, and treatment options, and navigate and connect with community resources.

Provide families across North Carolina with parent-to-parent support, information, and resources to help their family members build fulfilling lives.

Assess gaps across the agency and NC communities and address them through our efforts and increased partnerships with diverse community stakeholders to reach traditionally underserved members of the population.

Create the most efficient and effective public policy strategies to advocate for the needs of the autism community.

Educating Communities

To ensure ASNC teaches evidence-based best practices and works to increase the understanding and appreciation of people with autism in the community.

Increase autism awareness, acceptance, and appreciation among all members of the community.

Provide excellent customer service in all encounters with members of the community.

Enhance ASNC's brand awareness so that people know where to get help throughout their lifetimes.

Infrastructure

To ensure that ASNC has the infrastructure and nimbleness to sustain continued growth and succeed in the changing political, funding, and service delivery environment.
