# What are the medical workers wearing?

Nurses, doctors and other medical workers help people.

They help sick people and they want everyone to stay healthy and safe.

Sometimes, they wear uniforms that look different.

They might wear a big gown and gloves.

They might also wear a mask and a plastic shield over their face.

They wear these uniforms to keep germs away from them, and to keep germs away from me.

The doctors and nurses want to help me stay healthy.
